Dear Rep. _____,
I am writing to you to ask you to support the enshrinement of four fundamental rights for youth (people ages 0-18) in state law:

1. Voting Rights for All, Regardless of Age – Abolish the voting age, ensure automatic voter registration at birth, mandate voting, and guarantee easy access for children to participate in elections.

2. Abolition of Guardianship/Custody Powers– End parental control over youth while strengthening parents' legal obligations to provide food, clothing, and shelter. Youth should have full legal personhood and autonomy.

3. Radical Education Reform – Reduce compulsory schooling to two hours per day, focusing solely on reading, writing, arithmetic, youth liberationist literature, human rights, and democratic governance.

4. Youth Workers' Rights – Abolish the minimum working age while ensuring equal pay, super strong labor protections, and quick access to jobs. No person ages 0-18 should perform physical labor, voluntarily or otherwise. These should all be service sector jobs. These rights are important to ensuring young people's equal standing in society. I ask you to champion these reforms and look forward to your response.
Sincerely,
_____

Dear Senator _____,

I am writing to urge you to support several critical reforms that will expand educational access, promote youth rights, and address food insecurity for all young people (ages 0-18) in our community.

First, I ask that you advocate for the expansion of the College in the High School program to allow all youth (ages 0-18) to enroll in free college courses at their local colleges and community colleges. This initiative would provide young people with access to higher education from an early age, fostering intellectual growth and empowering them with meaningful learning opportunities beyond the standard K-12 curriculum.

Second, I encourage you to support the abolition of compulsory schooling beyond two hours per day. These two hours, taken at each student's local high school, should be exclusively dedicated to youth liberationist literature, human rights, and the study of democratic governance structures, both contemporary and from the last 50 years. This educational model would prioritize civic engagement and global awareness while respecting the autonomy of young people to pursue their own interests and self-directed learning.

Lastly, I urge you to back the creation of a universal meal program that provides free breakfast, lunch, and dinner to all youth (ages 0-18) in schools. Expanding upon the current free and reduced-price meal program, this initiative would ensure that every young person has reliable access to nutritious meals, regardless of their family's income.

These reforms would promote educational freedom, reduce food insecurity, and recognize the inherent rights of youth to access meaningful education and nourishment. I appreciate your leadership on behalf of our community and ask for your support in advancing these vital initiatives.
Sincerely,
_____

Dear Rep. _____,
As your constituent, I ask you to take bold action in supporting both the rights and well-being of young people. Babies and children under five deserve access to the care and resources necessary for their health and development. I ask you to introduce and vote for legislation that provides:

1. Free diapers, baby clothes, and baby formula: so no child goes without basic necessities.

2. Free high quality healthcare for babies: to ensure all infants receive high quality medical care regardless of family income.

3. Free daycare for ages 0-5: to support working families and give every child a strong start in life.

4. The Abolition of daycare for children over five: older kids deserve autonomy and full legal rights rather than being placed in institutions that control their time and choices.

Youth liberation is imperative—while babies and toddlers need a lot of support, older children should be recognized as independent individuals. Expanding resources for the youngest while empowering youth with autonomy will create a more just society.

Thank you for your time and I urge you to advance these changes in legislative sessions.
Sincerely,
_____
